Kort præsentation

Jeg er lektor og min primære forskning handler om udvikling og implementering af såkaldt komplekse interventioner (dvs. interventioner, der kræver at flere aktører arbejder sammen om, at lave flere forandringer i praksis) i primærsektoren. For eksempel afprøver vi om praktiserende læger kan styrke nybagte forældres opmærksomhed på deres barns mentale trivsel. Jeg skal de kommende år undersøge hvordan mennesker, som er i et intensivt vægttabsforløb oplever, at kostændringer og medicinsk behandling påvirker deres hverdag. Jeg er i den forbindelse særligt interesseret i, hvordan familien oplever at dele hverdag med en voksen, som er i intensivt vægttabsforløb.

Jeg er leder af børne- og ungeforskningsgruppen på afdeling for almen medicin. Her forsker vi i svangreomsorg, det tidlige forældre-barnforhold og mental trivsel og søvn hos store børn.

Jeg har en akademisk baggrund i sprogpsykologi og en ph.d. i implementeringsvidenskab; så meget af mit forskningsfokus handler om, hvordan fælles forståelse mellem sundhedsudbydere og patienter kan nås og bæredygtige modeller for sundhedsforebyggelse kan implementeres.

Jeg er leder af børne- og ungeforskningsgruppen på afdeling for almen medicin. Vi forsker i svangreomsorg, det tidlige forældre-barn-forhold og mental trivsel og søvn hos større børn.
